Abstract

The Universe

By Diert Maage

Chairperson of the Supervisory Committee:

Professor Janessa Bughatti
Department of Science

A thesis presented on the history of astronomy and the solar system, beginning with the birth of the solar system, and covering the geology, atmosphere, and moons of Mercury, Venus, Earth, Mars, Jupiter, Saturn, and Uranus.

ACKNOWLEDGMENTS

The author wishes to express sincere appreciation to Professors Smith and Jones for their assistance in the preparation of this manuscript. In addition, special thanks to Dr. Elsa Leavitt whose familiarity with the needs and ideas of the class was helpful during the early programming phase of this undertaking. Thanks also to the members of the school council for their valuable input.

GLOSSARY

Asteroid. A very small planet ranging from 1,000 km to less than one km in diameter. Asteroids are found commonly around other larger planets.

Atmosphere. The gaseous mass that surrounds any planet, including Earth.

Density. The number (as of particles) per unit of measure.

Galaxy. A system of stars independent from all other systems.

Moon. The natural satellite of any planet.

Orbit. The path taken by a satellite around a celestial body.

Planet. A large, nonluminous mass, usually with its own moons, which revolves around a star. Planets are found everywhere in the galaxy.

Solar. Having to do with the sun.

THE SOLAR SYSTEM

To Customize This Thesis:

Insert your information in place of the sample text, and then click **Save As** on the **File** menu. In the **Save as type** list, click **Document Template**.

To Create a Document from the Template

To open the thesis template as a document, on the **File** menu, click **New**. The customizations you made will appear in the document.

To change the spacing between, for example, body text paragraphs, click in a paragraph, and then click **Paragraph Settings** on the **Home** ribbon. On the **Indents and Spacing** tab, under **Spacing**, adjust the number in the **Before or After** list, and make additional adjustments as needed.

To save your style changes, with the cursor blinking in the changed paragraph, click **Styles and Formatting** on the **Formatting** menu. In the **Styles and Formatting** pane, right-click the selected style and choose **Update to Match Selection**.

How to Insert a Picture or Caption

On the **Insert** menu, point to **Picture**, and then click the command that corresponds to the type of element you want to insert. To insert a caption, in a new paragraph, on the **Format** menu, click **Styles and Formatting**. In the **Styles and Formatting** task pane, click **All styles** in the **Show** list, and then make the selection you want in the list.
